Innovative Software Solutions' Picas Product Joins Forces with Griffin and Express Seed

GRAND RAPIDS, MI , September 25, 2008 - Picas Greenhouse Production Software has recently added Griffin and Express seed to its impressive list of B2B Integration Partners. These integrations allow for users to directly connect to a broker to receive orders, send availability and acknowledgements, and send invoices. In addition to these new Integration Partners, Picas currently supports B2B integration with Ball, Syngenta, Michell's and McHutchinson. Picas has improved the B2B process to streamline sending availability and to allow orders received without errors to post directly to the Picas Order Entry module, thus eliminating double entry and saving time and money.

Picas has also partnered with both MasterTag and John Henry, allowing tags to be dropped shipped directly to the customer.

For additional information on Picas Integrations, contact Alison Cory or visit www.picas-software.com .

ABOUT INNOVATIVE SOFTWARE SOLUTIONS - Innovative Software Solutions is the developer of Picas Greenhouse Production Software -- a fully integrated program used to manage everything from inventory, accounting, crop management and speculation, labor tracking, order entry, and data collection.
